Dental Emergencies

Oral injuries are often painful, and should be treated by a dentist as soon as possible. Dental Emergencies may include teeth that have been knocked out, forced out of position, or broken. Sometimes lips, gums or cheeks have cuts.

When a **tooth is knocked out** you should: Attempt to find the tooth

- ♦ Gently rinse, but do not scrub the tooth to remove dirt or debris
- ♦ Place the clean tooth in your mouth between the cheek and gum
- ♦ Do not attempt to replace the tooth into the socket. This could cause further damage
- ♦ If it is not possible to store the tooth in the mouth of the injured person, wrap the tooth in a clean cloth or gauze and immerse in milk
- ♦ Get to the dentist as soon as possible. If it is within a half an hour of the injury, it may be possible to re-implant the tooth

If the tooth is pushed out of place (inward or outward), Do not force the tooth into the socket. Hold the tooth in place with a moist tissue or gauze. Again, it is vital that a dentist see the injured individual as quickly as possible.
